# HARGON

Hargon Engineering Sdn Bhd was established in 1980 in Malaysia and has over the last few decades weather various economic challenges. Comprising several engineering professionals from the tanker manufacturing industries who pooled together their experience in the pursuit of entrepreneurial ventures.

Hargon Engineering today is a revered industry brand name that remains synonymous with quality, customisation capabilities and industry experience. As a specialist in the design and manufacture of various types of road transport such as dry bulk tankers, liquid tankers, pressured tankers, trailers, car carriers, vehicle bodies, environmental equipment, and to more sophisticated road transport equipment that requires advance technologies, large scale machineries and latest design software, the company continues to be resilient yet prudent and progressive in its quest for long term growth.

Form the first day of operations until today, Hargon is one of its kind in the industry which has experienced changes through society, technology advancement and economic conditions.

The strong desire to succeed attitude from the management team and employees led to the investment of its own plant in Klang in 1997, complete with specialised manufacturing equipment and trained manpower to gear up its competency factor.

Armed with the vision to be amongst Malaysia's renowned engineering companies in Malaysia and South East Asia, the company is a market leader in the areas of its proprietary car carrier. It promises quality, consistency and reliability making it a preferred industry brand name.

Today the business is led by Executive Director, Chong Pim Sam and his son, Chong Jia Hao, who form a formidable team dedicated to building and supporting its branding through innovative designs, quality products, timely delivery, ensuring customer satisfaction as well as reliability and trustworthiness.

**OUR VISION :**

To be recognized in ASEAN as one of the Top Transport Equipment Engineering Company.

**OUR MISSION :**

To translate Advanced Technologies into Innovation Solutions for better business.
